Personal Stumbling Blocks

Responses to life events and people may, at times, be excessive to the situation. This is usually due to one or more experiences that have never been settled inside oneself. Many of these unhappy incidents took place during childhood, and often have been consciously forgotten. These old unresolved feelings continue to be released along with a current incident that contains similar feelings. **The following list refers to those negative overreactions that frequently recur.**

Directions: Check each box of the item that applies to you. At the end of this form you may identify any item with the number that you checked, and give a brief explanation of the complaint. Further discussion may be done in person. Additional complaints not covered elsewhere may be added to the "Comment" section on the other side.
